

**ACO stainless steel drainage  
with hygienic design**

### ACO stainless steel drainage

ACO is one of the world's leading drainage specialists. With 60 years experience gained across a wide range of sectors, we understand the critical role that drainage plays in a successful business and appreciate that what's below the surface can really count.

Our passion for producing high performance products has led us to make major investments in research and development. Working in partnership with commercial facilities owners, managers and operators, we are continuously developing our products and enhancing our expertise.

We are also committed to raising the profile of hygienic drainage throughout the industry to enable asset owners to reduce costs and protect their brands.

Our product portfolio now includes items, which are fully compliant with highest hygienic requirements. Products in this category exceed requirements reserved for food contact surfaces and conform with legal standards used across the world including EN1253, EN1433, CE-marking and differing fire protection requirements. We also have a full understanding of the food industry's own standards such as HACCP and work with bodies including the European Hygienic Engineering and Design Group (EHEDG).

#### ACO drainage is used in applications anywhere where hygienic, corrosion resistant and durable drainage performance is essential:

- Professional kitchens
- Food processing facilities
- Brewing, bottling and canning plants
- Chilled warehouses
- Laboratories
- Chemical and pharmaceutical industries
- Restaurants
- Schools
- Hospitals
- Hotels

#### Why stainless steel?

Stainless steel has the following unique advantages:

- Highly corrosion resistant
- Non-porous, easy to clean and disinfect
- Aesthetically pleasing
- Resistant to temperature extremes and thermal shock
- Coefficient of linear expansion similar to concrete
- 100% recyclable material

**Drainage is manufactured from austenitic stainless steel grades 1.4301 (304) or 1.4404 (316L) to EN 10088.**

#### Why ACO tray channels?

As the largest producer of stainless steel drainage systems ACO has the knowledge, experience and expertise to offer the optimal drainage solutions for every application. Therefore ACO offers the designer the freedom to choose from a standard range of products as well as custom made solutions to suit any application.

| EN 10088      | AISI        |
|---------------|-------------|
| <b>1.4301</b> | <b>304</b>  |
| <b>1.4404</b> | <b>316L</b> |

#### Surface treatment of stainless steel

The process of cutting, forming and welding of stainless steel will introduce impurities into the surface of the material and unless the appropriate action is taken, the material will begin to corrode and ultimately fail in service. Therefore after fabrication into the final product, it is vital that the stainless steel material is treated with the correct surface treatment to ensure the material is fully corrosion resistant. By applying pickle passivation as the primary surface treatment, the corrosion resistance of stainless steel can be fully restored to its original state, ensuring long and reliable life performance together with the required aesthetic appearance.

#### Finishes used by ACO include:

##### Pickle passivation (acid treatment).

All ACO drainage is pickle passivated by immersing them in a series of acid baths. This is a fundamental requirement for removing iron embedded particulates introduced in the fabrication process and also restoring the chromium depleted regions generated by the welding process. ACO has one of the largest and modern pickle passivation installations in Europe which ensures the optimum corrosion resistance of our products.

#### Electropolishing (electrochemical process)

After pickle passivation, some products are then immersed in an electrolytic fluid in which the products become the anode of a direct current electrical circuit. This process is characterized by the selective attack on the surface of the components whereby upstanding roughness is preferentially dissolved and will yield a progressively smoother, brighter surface. All tray channel grates are electro-polished as standard.

## ACO hygienic design

### Hygienic design

#### Products designed with hygiene in mind.

The ACO offers sustainable, integrated drainage systems designed to protect your business and the environment. Our aim is to constantly improve every aspect of safety, hygiene and functional performance.

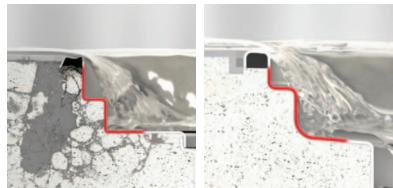

We believe our systems and services are truly unique, delivering unparalleled benefits to everyone involved in project delivery or subsequent operation

ACO hygienic drainage fulfil stringent hygienic requirements to prevent harmful bacteria contamination. We apply relevant hygiene design principles reserved for food contact surfaces EN 1672, EN ISO 14159 and EHEDG document 8 requirements to the channel design.

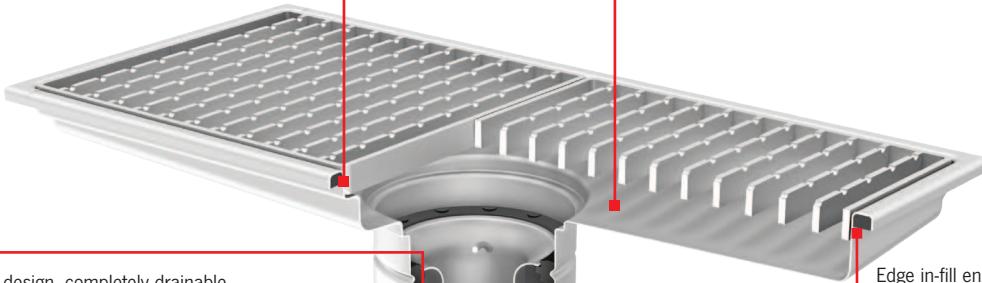

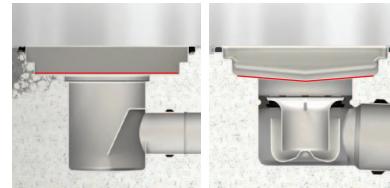

#### ACO hygienic design features:

- Fully drainable
- Internal radiiuses larger than 3 mm
- No metal to metal contact
- Edge infill
- Minimal slope 1% longitudinal and cross on all areas
- Reinforced bottom for width > 300mm
- Precise outlet diameter for easy and safe connection to the gully body or pipe system
- Special design of outlet allow easy drain of all waste water out of channel

All radiiuses larger than 3mm which greatly increases cleaning effectiveness

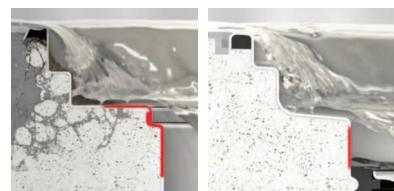

Deep-drawn body ensures smooth contours eliminating crevices that can nest dangerous bacteria

Dry sump design, completely drainable - eliminating stagnant water, smells, microbial growth and potential chemical hazards.

Edge in-fill ensures stable and durable transmission between the gully and surrounding floor and helps to minimize risk of floor cracks which could harbour microorganism

## ACO fire proof solution

### Fire protection solution

#### Characteristics

ACO has developed solution which prevents spreading of fire and high temperatures within different building floors where ACO gullies or ACO channels and ACO gullies are installed.

The solution has been tested according to EN 1366-2 Fire resistance tests for service installations and classified according to EN 13501 Fire classification of construction products and building elements. For classification details see chart below.

ACO gully fire protective kit can be used

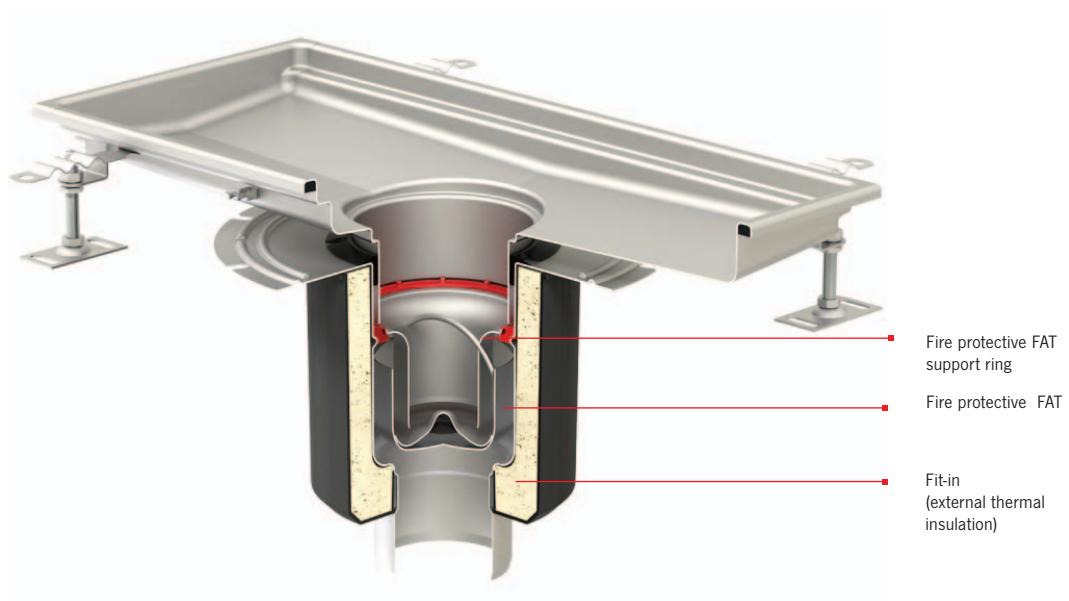

either with telescopic vertical or fixed height vertical ACO gullies 142, ACO gullies 157 and ACO gullies 218 and consist of following items.:

- External protection – Fit in
- Internal protection
  - Fire protective foul air trap
  - Fire protective foul air trap support

This solution has been designed and tested for using in either concrete or aerated concrete ceiling slabs with minimum height of 150 mm.

ACO gullies installed with ACO gully fire protective kit can be connected to any kind of sewerage pipes regardless of its material, e.g. non combustible cast iron drain pipes SML, stainless steel ACO pipes (building material class A1) or plastic drains pipes (building material class B1/B2). All mentioned components of external and internal protection must be used to guarantee correct function of fire protection!

Tested at: PAVUS, a.s. protocol:  
No. Pr-13-2.061

| Gully type    | Outlet diameter | Classification |
|---------------|-----------------|----------------|
| ACO gully 142 | 75              | EI 180         |
|               | 110             | EI 120         |
| ACO gully 157 | 75              | EI 180         |
|               | 110             | EI 120         |
| ACO gully 218 | 110             | EI 180         |
|               | 160             | EI 90          |

Classification according to EN 13 501, protocol: PK2-11-13-901-C-0

ACO gully

## ACO gullies

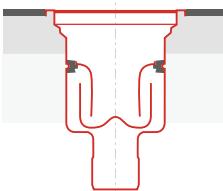

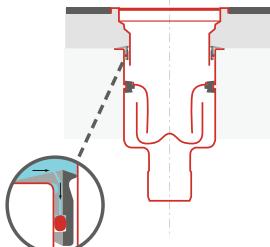

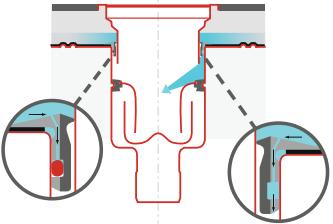

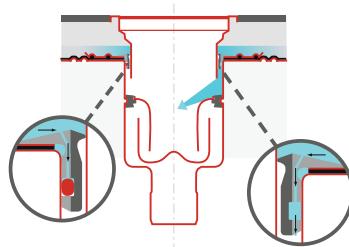

### System overview

#### Characteristics

ACO stainless steel gullies are designed to be used in commercial applications where hygiene, durability and performance requirements are paramount. ACO gullies are available in a number of versions featuring different flow rates, grating designs, sizes and spigot outlet diameters to suit various applications. The floor construction and depth together with the use of any waterproofing membrane play an important role in the selection of the appropriate type of gully. ACO offers 4 generic gully configurations as shown in the table below.

Fixed height gullies are convenient, free-standing units suitable for cementitious, resin or tiled floors. Telescopic gullies can be installed either with ACO gully tops or with ACO stainless steel linear drainage channels in most flooring constructions, including floors with waterproofing membranes.

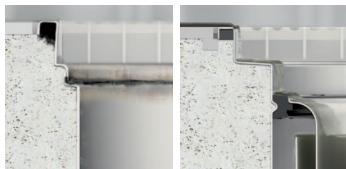

All ACO gullies are available with vertical or horizontal spigot outlets.

| <b>Fixed height gullies</b>     |   |  |
|---------------------------------|---|--|
|                                 |   | <ul style="list-style-type: none"> <li>▪ Fixed gully height</li> <li>▪ No waterproofing membrane connection</li> <li>▪ No seepage drainage facility</li> </ul>   |
| <b>Telescopic gullies</b>       |   |  |

## ACO gullies

### Hygienic design features

All radii larger than 3mm which greatly increases cleaning effectiveness

✗ ✓

Edge in-fill ensures stable and durable transmission between the gully and surrounding floor and helps to minimize risk of floor cracks which could harbour microorganism

✗ ✓

Deep-drawn body ensures smooth contours eliminating crevices that can nest dangerous bacteria

✗ ✓

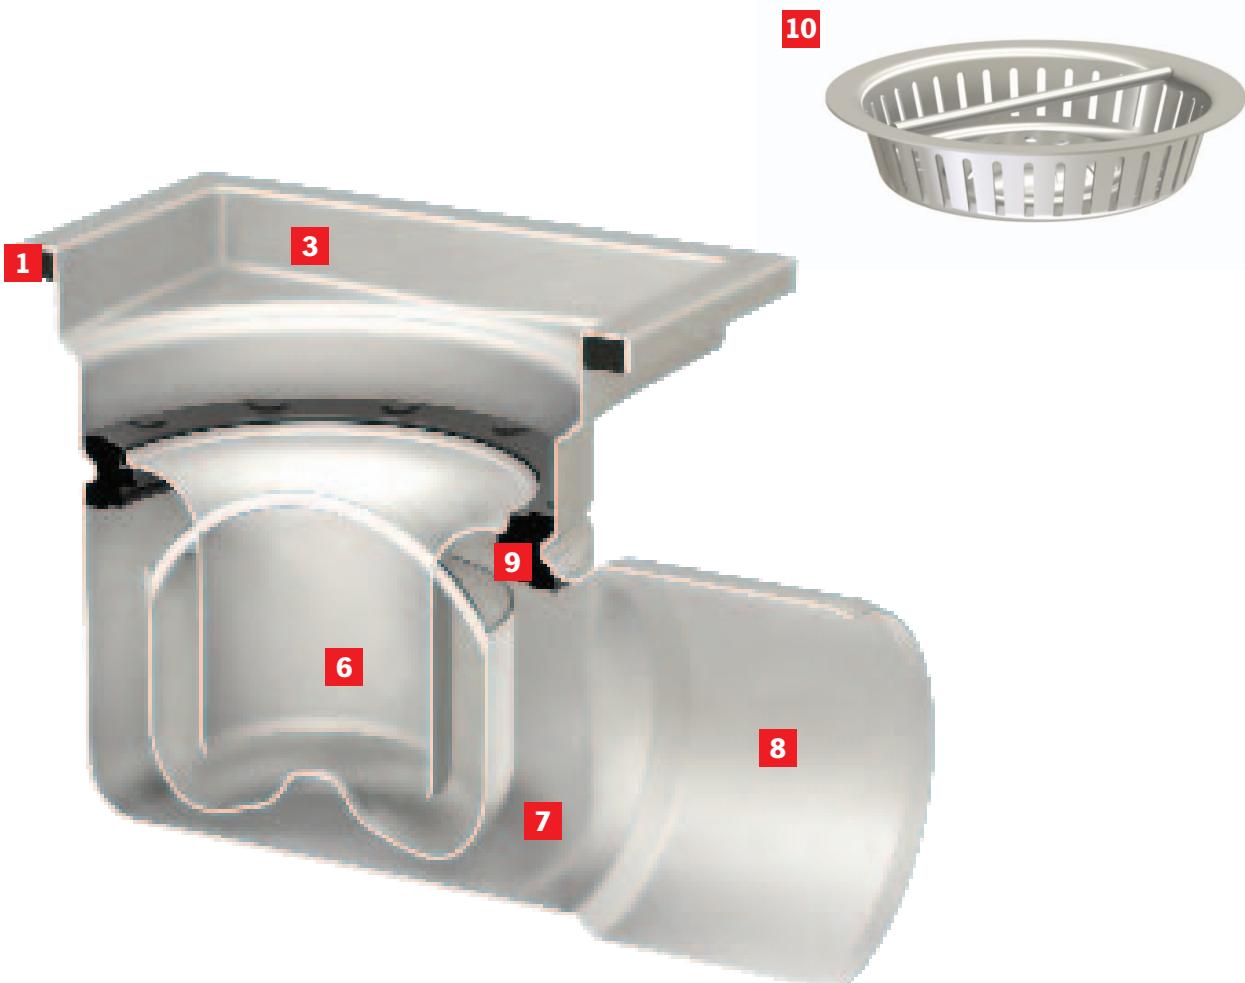

Dry sump design, completely drainable - eliminating stagnant water, smells, microbial growth and potential chemical hazards.

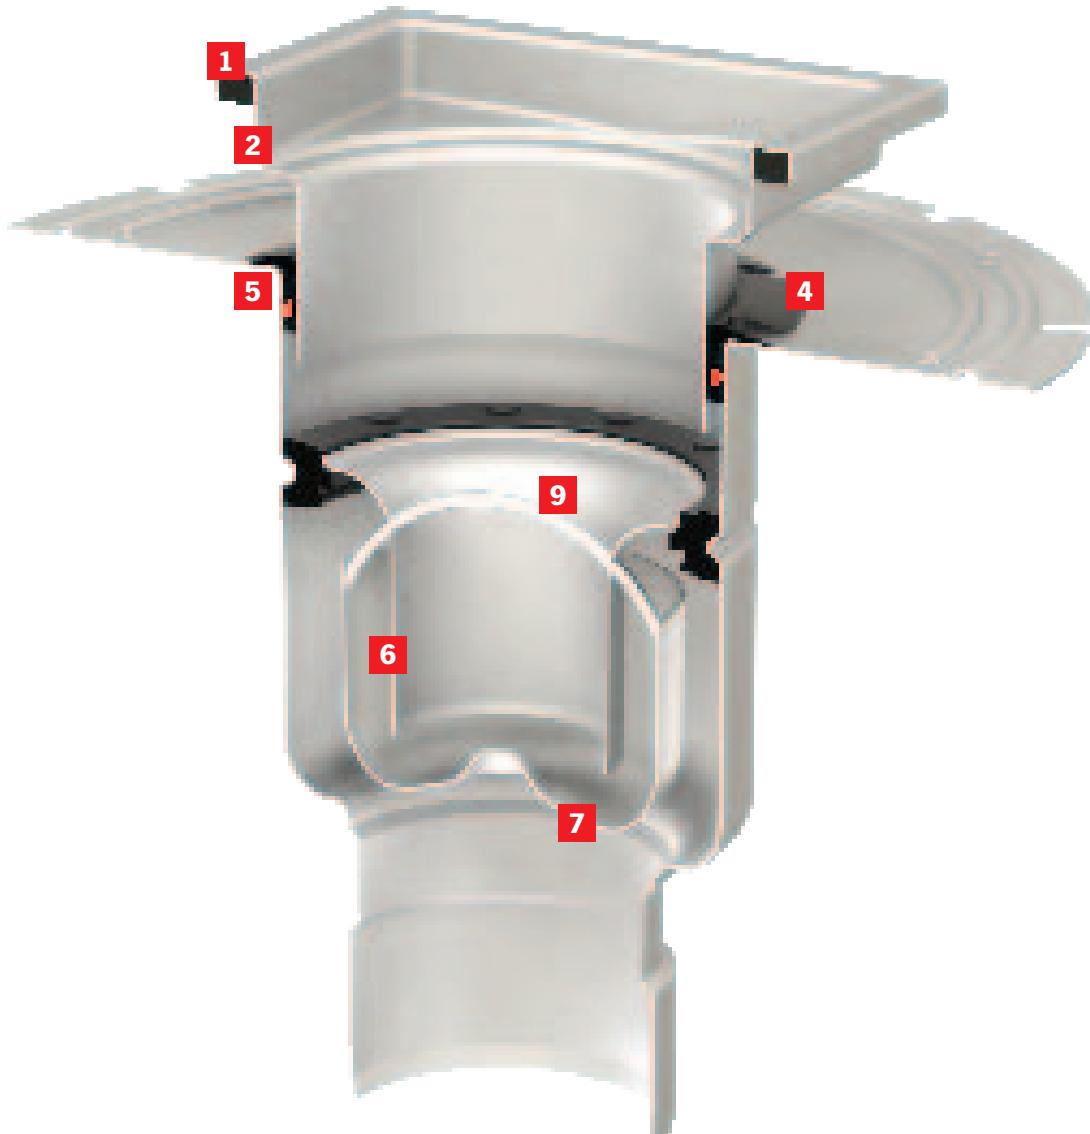

✗ ✓

## ACO gullies

### Features horizontal outlet gully

- 1** Edge in-fill significantly improves hygiene and durability
- 2** Large radius for easy cleaning
- 3** Deep-drawn body ensures smooth contours eliminating crevices.
- 4** Friction ring reduces installation time
- 5** Friction ring easily convertible for membrane drainage
- 6** Foul air trap design minimises evaporation rate and aerosol mobility
- 7** Dry sump design, no water retention in sump
- 8** Gully flow rate and self-cleaning exceeds requirements of EN 1253
- 9** Fully removable foul air trap and support for easy cleaning
- 10** Deep-drawn stainless steel silt basket eliminates crevices

**ACO gullies****Features vertical outlet gully****Specifier benefits**

- Hygienic design following EN 1672, EN ISO 14159 and EHEDG document 8 requirements
- Stainless steel construction for durability and long life
- Gully top edge infill supplied as standard for hygiene and durability
- Wide range of gratings for all load class applications
- Slip resistant gratings available for added user safety
- Low construction height
- Fully compliant to EN 1253
- Reliable waterproofing membrane connection options
- Waterproofing membrane seepage drainage provision
- Suitable for all floor types including vinyl flooring

**Installing contractor benefits**

- Low construction height
- Friction lock telescopic adjustment reduces installation time
- Gully levelling facilities
- Quick and reliable flange connection for waterproofing membranes
- Friction ring converts easily to membrane seepage drainage
- Gully top edge infill for durability and eliminates time-consuming back filling
- Easy installation for all floor types – ceramic tiles, cementitious and resin screeds, vinyl

**User benefits**

- Fully compliant to EN 1253
- Hygienic design following EN 1672, EN ISO 14159 and EHEDG document 8 requirements
- Slip resistant gratings available for added user safety
- Easy and low cost cleaning
- Stainless steel construction for durability and long life
- Optional silt basket
- Wide range of gratings
- Gully top edge infill for hygiene and durability
- Positive membrane drainage for enhanced construction life

**ACO gullies****Friction ring**

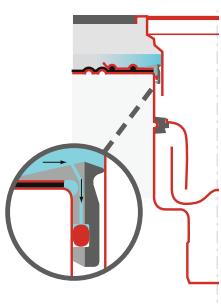

Sealing function

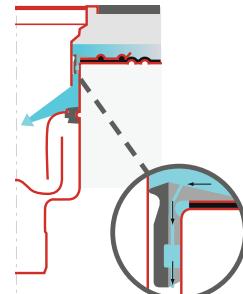

Easy removable sealing ring

Drainage function

Removal of the red O-ring opens the water drainage ways

**ACO gullies****Hygienic gully guide****Step 1**

Depending on the composition of floor construction the appropriate type of the gully should be selected.

| No waterproofing membrane  | Waterproofing membrane present  |  |   |
|--|---|--|---|
| Fixed height   | Telescopic adjustable – location flange   | Telescopic adjustable – adhesive bonding flange  | Telescopic adjustable – mechanical clamping flange  |
|   |    |    |    |
| <ul style="list-style-type: none"> <li>▪ Fixed height</li> <li>▪ Easy installation</li> <li>▪ Suitable for areas where waterproofing is independent of the gully body</li> </ul> | <ul style="list-style-type: none"> <li>▪ Used in combinations with gully tops or linear drainage channels</li> <li>▪ Adjustable height and rotation of the gully top</li> <li>▪ Ideal for applications where final floor height unknown</li> <li>▪ Suitable for areas where waterproofing is independent of the gully body</li> </ul> | <ul style="list-style-type: none"> <li>▪ Waterproof connection by welding or adhesive bonding</li> <li>▪ Usable with gully tops or linear drainage channels</li> <li>▪ Adjustable height and full rotation of the gully top</li> </ul> | <ul style="list-style-type: none"> <li>▪ Waterproof connection by mechanical clamping flange</li> <li>▪ Usable with gully tops or linear drainage channels</li> <li>▪ Adjustable height and full rotation of the gully top</li> </ul> |

**Step 2**

Establish the location, size, orientation and invert depth (if appropriate) of slab/screed pipework as this will determine the type of gully.

| Vertical outlet   | Horizontal outlet  |
|---|--|
|  |  |

## ACO gullies

### Hygienic gully guide

#### Step 3

An important factor in the selection of gully is the required flow rate. Flow rate is affected by several factors such as the size and height of the gully body,

|            | vertical outlet flow rate [l/s] | Fixed height gullies |         |         | Telescopic adjustable gullies |         |         |
|------------|---------------------------------|----------------------|---------|---------|-------------------------------|---------|---------|
|            |                                 | DN/OD                | 200x200 | 250x250 | 300x300                       | 200x200 | 250x250 |
| <b>142</b> | 70/75 mm                        | 1.4                  | -       | -       | 1.4-1.8                       | -       | -       |
|            | 100/110 mm                      | 1.6                  | -       | -       | 1.6-2.0                       | -       | -       |
| <b>157</b> | 70/75 mm                        | 2.7                  | 2.7     | -       | 2.7-3.3                       | 2.7-3.3 | -       |
|            | 100/110 mm                      | 3.5                  | 3.5     | -       | 2.8-4.4                       | 2.8-4.4 | -       |
| <b>218</b> | 100/110 mm                      | -                    | -       | 5.0     | -                             | -       | 5.0-6.2 |
|            | 150/160 mm                      | -                    | -       | 5.0     | -                             | -       | 5.0-6.2 |
| <b>142</b> | 70/75 mm                        | 1.4                  | -       | -       | 1.4-1.8                       | -       | -       |
|            | 100/110 mm                      | 1.6                  | -       | -       | 1.6-2.0                       | -       | -       |
| <b>157</b> | 70/75 mm                        | 2.6                  | 2.6     | -       | 2.6-3.3                       | 2.6-3.3 | -       |
|            | 100/110 mm                      | 2.8                  | 2.8     | -       | 2.8-4.4                       | 2.8-4.4 | -       |
| <b>218</b> | 100/110 mm                      | -                    | -       | 4.4     | -                             | -       | 4.4-5.4 |

Flow rate performance without silt basket (flow rates with empty silt basket are approximately 15% lower than the values stated)

#### Step 4

For the collection of solid particles, the gully can be fitted with an optional silt basket.

| Gully spigot outlet position | "Gully Body Dia 142<br>Silt Basket Capacity (litres)" | "Gully Body Dia 157<br>Silt Basket Capacity (litres)" | "Gully Body Dia 218<br>Silt Basket Capacity (litres)" |
|------------------------------|---|---|---|
| Vertical                     | 0.4   | 0.6   | 1.4   |
| Horizontal & vertical        | 0.3   | 0.3   | 0.7   |

#### Step 5

The final floor finish determines the gully top selection.

| Ceramic/screed  | Thin-bed  |
|---|---|
|  |  |
| For tiled, resin screed or cementitious flooring                                    | For thin-bed applications   |

## ACO gullies

### Hygienic gully guide

#### Step 6

For the choice of the appropriate grating following properties have to be considered:

- Traffic load
- Hygiene
- Slip resistance

|                        | Ladder grating | Cast     |       |          |
|------------------------|----------------|----------|-------|----------|
|                        | Antislip       | Antislip | Plain | Antislip |
| <b>Hygiene</b>         | +++++          | +++++    | +++++ | +++++    |
| <b>Slip resistance</b> | +++            | +++      | +     | +++      |
| <b>Load classes</b>    |                |          |       |          |
| <b>200×200</b>         | R 50           | M125     | C250  | M125     |
| <b>250×250</b>         | R 50           | M125     | C250  | M125     |
| <b>300×300</b>         | R 50           | M125     | C250  | M125     |

**Product information**
**ACO Product benefits**

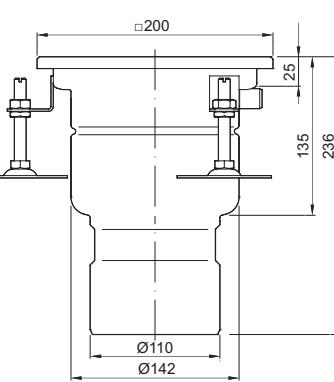

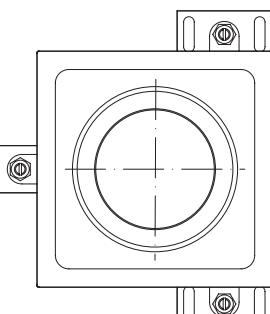

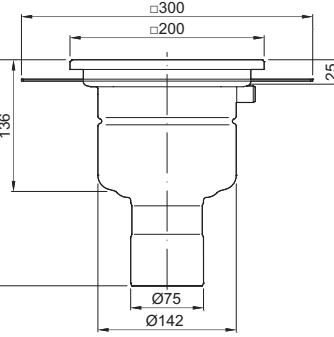

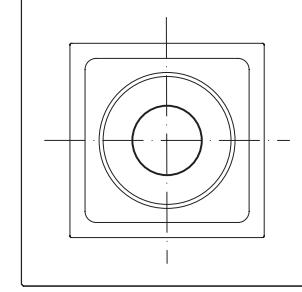

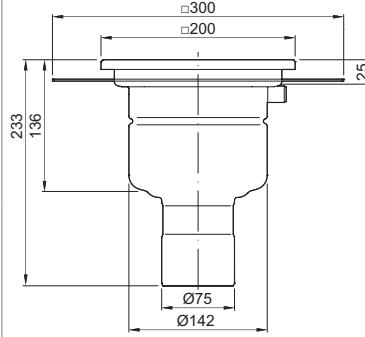

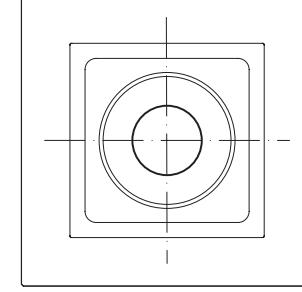

- Hygienic design following EN 1672 EN ISO 14159 and EHEDG document 8 requirements
- Stainless steel construction for durability and long life
- Wide range of gratings to Load Class L15 – M 125 (EN 1253) or C250 (EN 124) including antislip solution
- Fully removable stainless steel FAT

- Available in 1.4301 (304) or 1.4404 (316L) grades of stainless steel
- Fully removable and easily cleaned stainless steel foul air trap (FAT)
- Outlet diameter DN 70/DN 100 (75 mm or 110 mm OD)
- Tested and certified according to EN 1253

**telescopic – vertical outlet****Product information****ACO Product benefits**

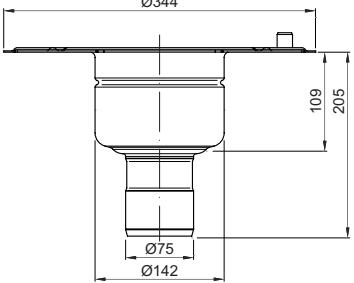

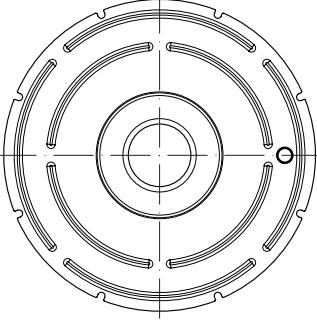

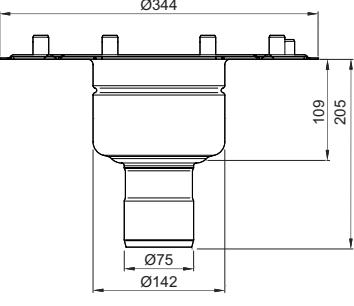

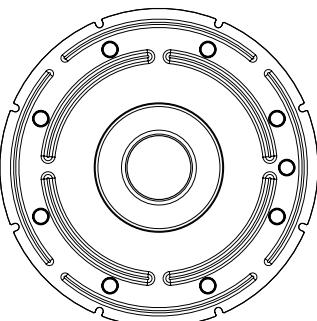

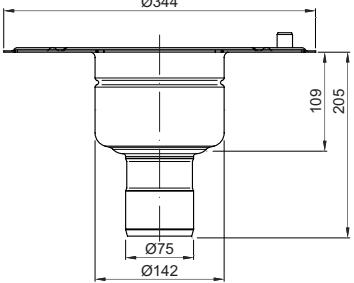

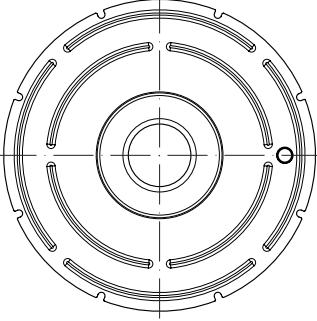

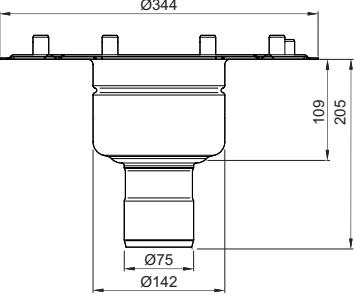

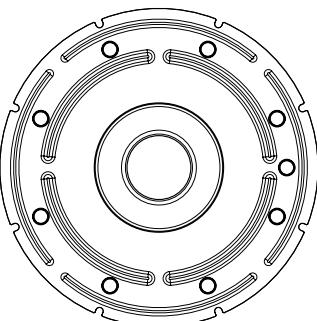

- Hygienic design following EN 1672, EN ISO 14159 and EHEDG document 8 requirements
- Stainless steel construction for durability and long life
- Wide range of gratings to Load Class L15 – M125 (EN 1253) or C250 (EN 124) including antislip solution
- Fully removable stainless steel FAT
- Fire tested and certified solution available for classes EI 90 – EI 180
- Dry installation kit "Fit-in" available

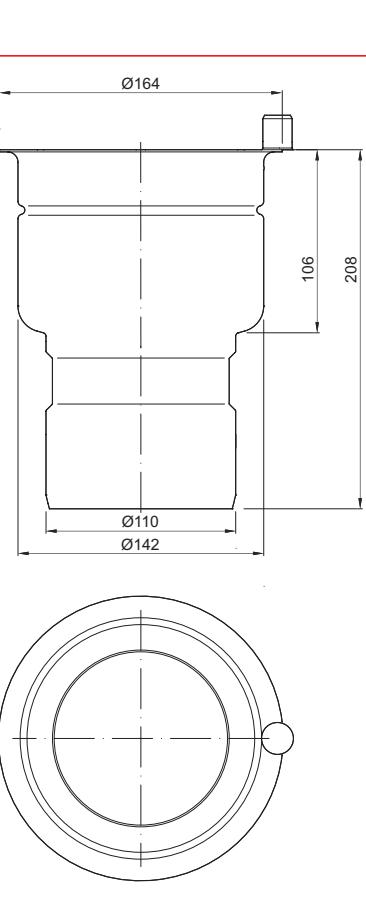

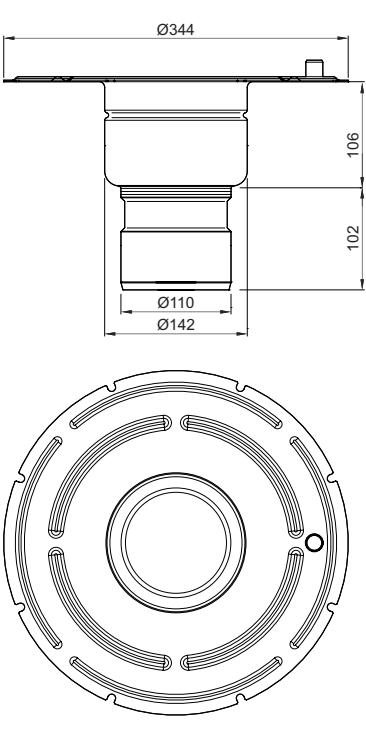

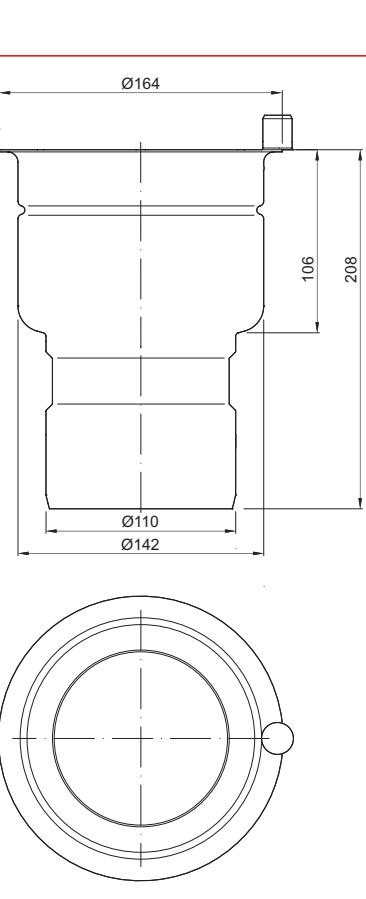

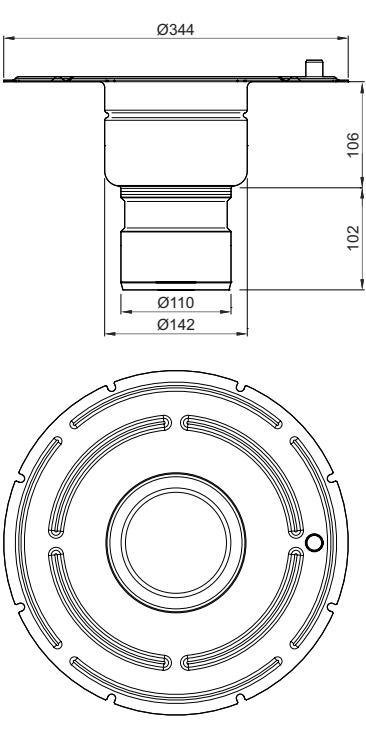

- Available in 1.4301 (304) or 1.4404 (316L) grades of stainless steel
- Fully removable and easily cleaned stainless steel foul air trap (FAT)
- Outlet diameter DN 70/DN 100 (75 mm or 110 mm OD)
- Telescopic friction ring included
- Tested and certified according to EN 1253

**telescopic – vertical outlet**
**Product information**
**ACO Product benefits**

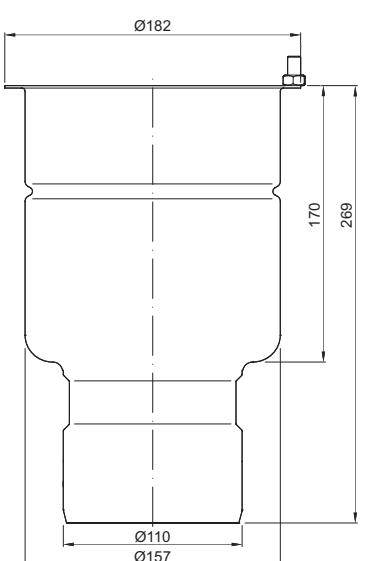

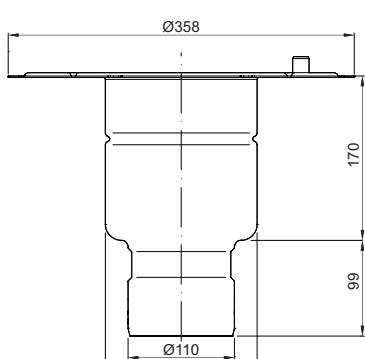

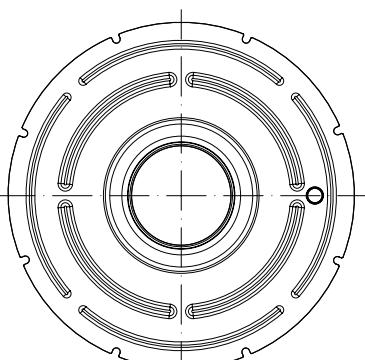

- Hygienic design following EN 1672, EN ISO 14159 and EHEDG document 8 requirements
- Stainless steel construction for durability and long life
- Suitable for all floor types including vinyl flooring
- Wide range of gratings to Load Class L15 – M 125 (EN 1253) or C250 (EN 124) including antislip solution
- Fully removable stainless steel FAT
- Fire tested and certified solution available for classes R 30 – R 120
- Dry installation kit "Fit-in" available

- Available in 1.4301 (304) or 1.4404 (316L) grades of stainless steel
- Gully top frame size: 300 x 300 mm
- Outlet diameter DN 100/DN 150 (110 mm or 160 mm OD)
- Gully body with location flange or integrated membrane flange for either adhesive bonding or mechanical clamp
- Telescopic friction ring included

ACO tray channel

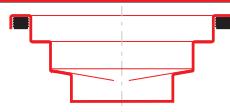

## ACO tray channels

### System overview

ACO tray channels are designed to be used in commercial applications where hygiene, durability and performance requirements are paramount. ACO introduces two new channel types that follow requirements of hygienic design and they exceed requirements reserved for food contact surfaces and conform with legal standards used across the world including EN1253, EN1433, CE-marking and differing fire protection requirements. ACO tray channels are available in number of different versions featuring different channel volume, flow rates, size and spigot outlet diameter to suit various applications.

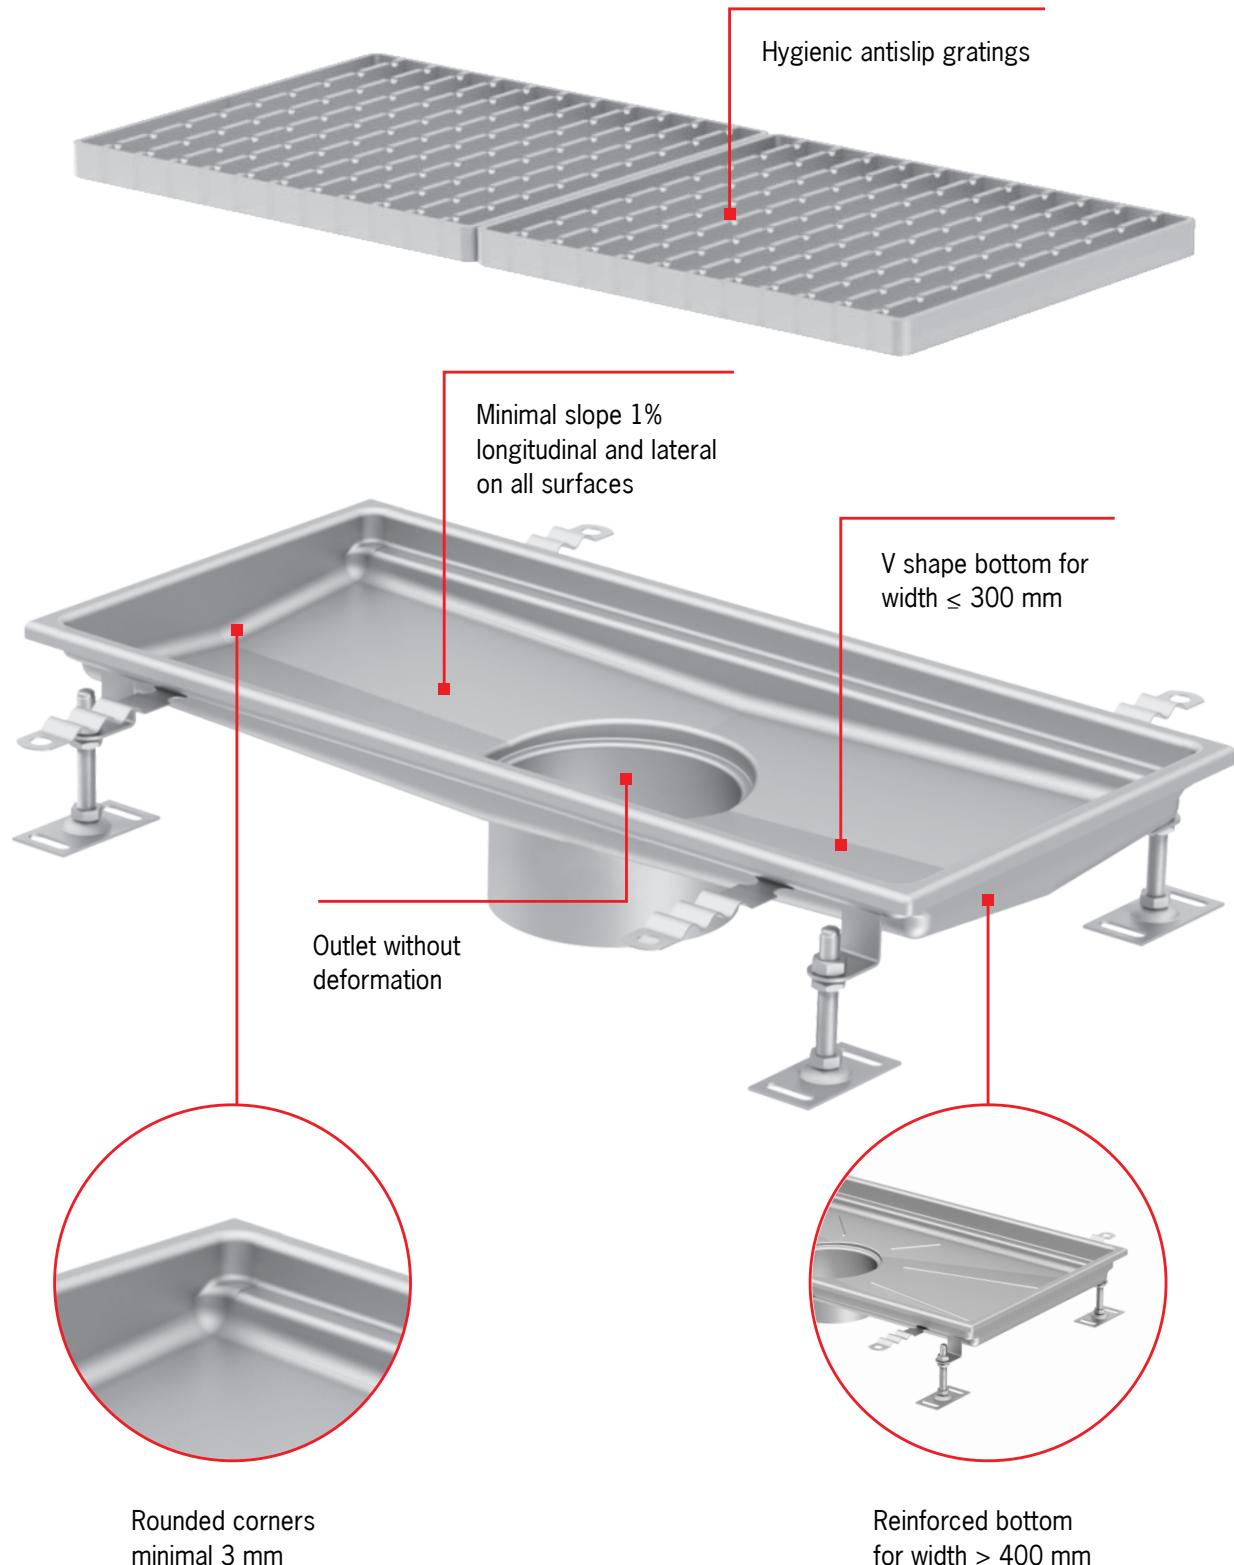

The floor construction and depth together with use of any waterproofing membrane play an important role in selection of the appropriate type of ACO tray channel. ACO offer 2 hygienic tray channel types as shown in the table below.

- **Standard type:** resin floor, concrete floor, tiled floor
- **Extended type:** tiled floor

| Standard type |   |
|---------------|---|
| Extended type |  |

## ACO tray channels

### Hygienic design features

#### ACO tray channels

#### Product features and benefits

#### Specifier benefits

- Fully compliant to EN 1253
- Stainless steel construction for durability and long life
- Channel edge infill supplied as standard for hygiene and durability
- Four different channel types covering all typical floor installations concrete, resin, tiles, vinyl
- Easy and secure telescopic connection with gully
- Reliable waterproofing membrane connection options
- High flow rate
- Easy to specify system
- Optimal hygienic solution

#### Installing contractor benefits

- Fully compliant to EN 1253
- Easy and secure telescopic connection with gully
- Reliable waterproofing membrane connection options
- Friction ring converts easily to membrane seepage drainage
- Height adjustable installation with telescopic edge configuration.
- Installation friendly connection of vinyl floor to the channel provided by vinyl edge
- Channel edge infill for durability and eliminates time-consuming back filling

#### Client benefits

- Hygienic design
- Fully compliant to EN 1253
- Optimal hygienic solution
- Slip resistant gratings available for added user safety
- Easy and low cost cleaning
- Stainless steel construction for durability and long life
- Optional silt basket
- Channel edge infill for hygiene and durability

## ACO tray channels

**Tray channel guide****Step 1**

Waterproofing membrane

| Waterproofing   | Floor finish                   | Channel type  | Drawing   |
|---|--------------------------------|---------------|---|
| Waterproofing membrane connected to the <b>gully</b>        | Tiled, concrete or resin floor | Standard type |  |
| Waterproofing membrane connected to the <b>tray channel</b> | Tiled floor                    | Extended type |  |

**Step 2**

Gully type selection

| Channel volume [litres] | Width [mm] | Length [mm] | Height [mm] | Channel outlet [mm] | Compatible gully |
|-------------------------|------------|-------------|-------------|---------------------|------------------|
| 0-10                    | 4,7        | 200         | 530         | 60                  | 125              |
|                         | 7,0        | 200         | 830         | 60                  | 125              |
|                         | 8,8        | 200         | 1030        | 60                  | 125              |
| 0-20                    | 10,4       | 200         | 1230        | 60                  | 125              |

## ACO tray channels

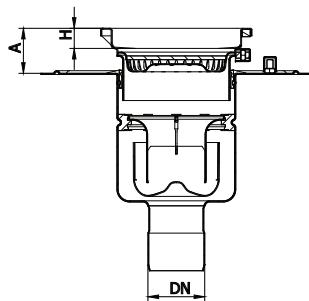

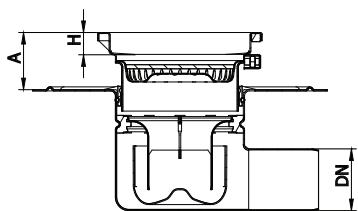

### Step 3

Tray channel flow

Third step of tray channel specification is related with flow rate. Flow rate reflects the channel ability to constantly drain certain amount of water. Flow rate is generally defined by ACO gully size which was specified in Step 2. Tray channel range is available with two different gully sizes:

- ACO gully 142
- ACO gully 157
- ACO gully 218

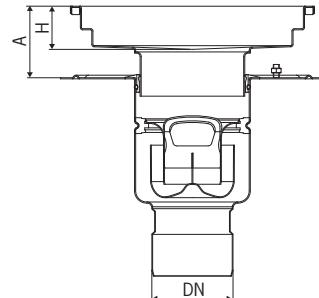

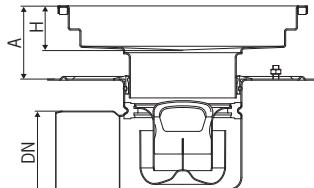

#### ACO gully 142

| ACO gully 142 |               | Flow rates [l/s] |        |  |
|---------------|---------------|------------------|--------|--|
|               |               | H=60 mm          |        |  |
| Gully outlet  |               | A min.           | A max. |  |
| Horizontal    | <b>DN 70</b>  | 1.4              | 1.7    |  |
|               | <b>DN 100</b> | 1.6              | 1.9    |  |
| Vertical      | <b>DN 70</b>  | 1.4              | 1.7    |  |
|               | <b>DN 100</b> | 1.6              | 1.9    |  |

Flow rates measured according to EN 1253.  
Flow rate performance without silt basket (flow rates with empty silt basket are approximately 15% lower than the values stated)

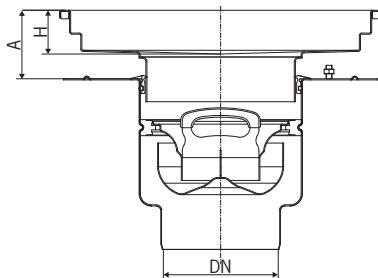

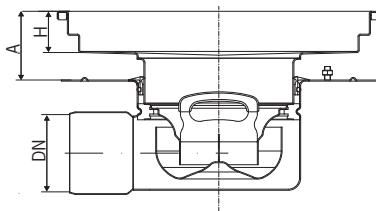

#### ACO gully 157

| ACO gully 157 |               | Flow rates [l/s] |        |  |
|---------------|---------------|------------------|--------|--|
|               |               | H=60 mm          |        |  |
| Gully outlet  |               | A min.           | A max. |  |
| Horizontal    | <b>DN 70</b>  | 2.8              | 3.1    |  |
|               | <b>DN 100</b> | 3.2              | 3.9    |  |
| Vertical      | <b>DN 70</b>  | 2.9              | 3.1    |  |
|               | <b>DN 100</b> | 3.9              | 4.2    |  |

Flow rates measured according to EN 1253.  
Flow rate performance without silt basket (flow rates with empty silt basket are approximately 15% lower than the values stated)

#### ACO gully 218

| ACO gully 218     |               | Flow rates [l/s] |        |         |        |          |        |          |        |          |        |
|-------------------|---------------|------------------|--------|---------|--------|----------|--------|----------|--------|----------|--------|
| Gully outlet      |               | H=60 mm          |        | H=80 mm |        | H=100 mm |        | H=150 mm |        | H=200 mm |        |
|                   |               | A min.           | A max. | A min.  | A max. | A min.   | A max. | A min.   | A max. | A min.   | A max. |
| <b>Horizontal</b> | <b>DN 100</b> | 4.5              | 4.7    | 4.8     | 4.9    | 4.9      | 5.1    | 5.0      | 5.6    | 5.6      | 6.4    |
| <b>Vertical</b>   | <b>DN 100</b> | 5.4              | 5.6    | 5.6     | 5.8    | 5.7      | 6.0    | 5.9      | 6.4    | 6.4      | 6.4    |
|                   | <b>DN 150</b> | 5.4              | 5.6    | 5.6     | 5.8    | 5.7      | 6.0    | 5.9      | 6.4    | 6.4      | 6.4    |

Flow rates measured according to EN 1253. Flow rate performance without silt basket (flow rates with empty silt basket are approximately 15% lower than the values stated)

#### ACO tray channels

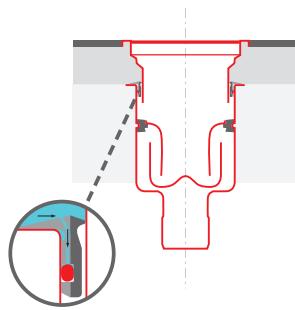

##### Step 4

Gully type

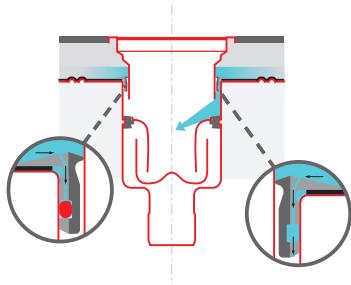

###### **There are two core gully functions.**

- Gully provides connection between channel body and foul drainage system. Each channel size has its own ACO gully defined in Step 3.
- Gully works as the odour trap and filtration unit. Odour from foul drainage system is prevented by a fully removable Foul Air Trap (FAT). Filtration of solid parts is provided by fully removable Silt Basket. FAT and Silt basket specification follows in Step 5.

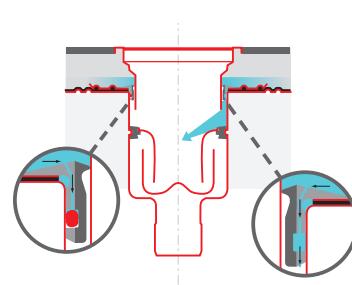

- Tray channel gullies offer three basic variations of telescopic connections between the tray channel and gully itself.**
- Telescopic connection with location flange
  - Telescopic connection with adhesive bonding flange
  - Telescopic connection with mechanical clamping flange

With location flange

With adhesive bonding flange

With mechanical clamping flange

Table below is the guide to pick up correct gully type.

| Telescopic connection WITHOUT flange for water proofing  | Telescopic connection WITH flange for water proofing  |
|--|---|
| <b>ACO gully 142</b><br><b>ACO gully 157</b><br><b>ACO gully 218</b><br><b>location flange</b>   | <b>ACO gully 142</b><br><b>ACO gully 157</b><br><b>ACO gully 218</b><br><b>bonding flange</b>   |
|  <ul style="list-style-type: none"> <li>▪ No waterproofing connection to the gully</li> </ul> |  <ul style="list-style-type: none"> <li>▪ Waterproofing welded or glued to the gully</li> </ul>       |
|  |  <ul style="list-style-type: none"> <li>▪ Waterproofing mechanically clamped to the gully</li> </ul> |

## ACO tray channels

**Step 5**

Gully accessories selection

**Following accessories are available:**

- **Foul air trap (FAT)** – blocks the odour coming from foul drainage system
- **Foul air trap support** – locates the FAT inside the gully body. Foul air trap support is mandatory if FAT used.
- **Silt basket** – filtration of solid parts
- **Sieve** – filtration of solid parts (shallow version)
- **Friction ring** – provides telescopic connection between tray channel and gully body. Friction ring installation set is mandatory if bonding flange or double clamping flange used.

| Telescopic connection without flange for water proofing   | Telescopic connection with flange for water proofing  |

**Step 6**

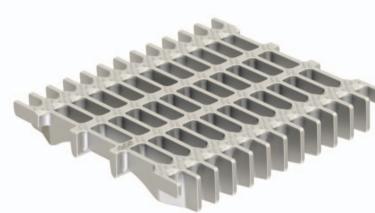

Grating selection

Hygienic design portfolio includes gratings. These complement the portfolio of gullies and channels suitable for areas where Food safety and Health&Safety are paramount. Ladder and Casted gratings follow hygienic design principles reserved for food contact surfaces EN 1672 and EN ISO 14159 and are available in different sizes and loading classes.

Tray channel range offers mesh grating with either plain or slip resistant finish and newly also cast

gratings. Grates are designed for Load Class – L 15. Grating size is based on channel body size.

- **Plain grating:** to be used in areas with reduced demand for slip resistance for example where trolleys are turning.
- **Slip resistant grating:** to be used in all areas where there is an increased risk of accident caused by slipping.

#### Product information

##### ACO Product benefits

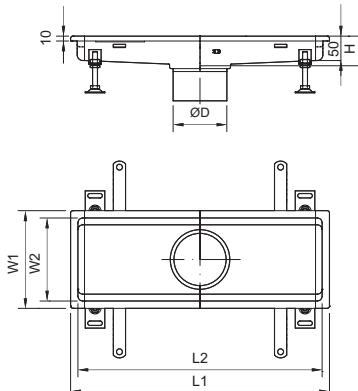

- Hygienic design following EN 1672, EN ISO 14159 and EHEDG document 8 requirements:
  - Hygienic antislip gratings
  - Minimal slope 1 % longitudinal and lateral on all surfaces
  - V-shape bottom for width  $\leq 300$  mm
  - Outlet without deformation
  - Rounded corners minimal 3 mm
  - Reinforced bottom for width  $\geq 400$  mm

- Gully compliant to EN 1253
- Available in 1.4301 (304) or 1.4404 (316L) grades of stainless steel
- Easy and secure telescopic connection with gully

**Channels - extended profile****Product information****ACO Product benefits**

- Hygienic design following EN 1672, EN ISO 14159 and EHEDG document 8 requirements:
  - Hygienic antislip gratings
  - Minimal slope 1 % longitudinal and lateral an all surfaces
  - V-shape bottom for width  $\leq$  300 mm
  - Outlet without deformation
  - Rounded corners minimal 3 mm
  - Reinforced bottom for width  $\geq$  400 mm
- Fully compliant to EN 1253
- Available in 1.4301 (304) or 1.4404 (316L) grades of stainless steel
- Easy and secure telescopic connection with gully

## Ladder gratings

### Specific product information

- Hygienic design following EN 1672, EN ISO 14159 and EHEDG document 8 requirements
- Ladder gratings with slip resistant finish
- Designed for Load Class - R 50 (version for 5 000 kg) and M 125 according EN 1253
- Surface - electropolished
- High flow capacity of grates
- Rounded corners
- Easy to clean grates = fully welded

## Mesh gratings

### Specific product information

- Mesh gratings with either plain or slip resistant finish
- Designed for Load Class - L15
- Grating size is based on channel body size

### Order information
