minimalist design

Shower channel ACO ShowerDrain S+

ACO ShowerDrain S+

Surprisingly simple. The new ACO ShowerDrain S+ shower channel combines elegance and high flow capacity in one product. It also combines the design possibilities of a conventional shower channel with the installation advantages of a floor drain. Exceptional quality, massive cover profile and easy handling during maintenance ensure a long service life without damaging the existing visual appearance of the channel.

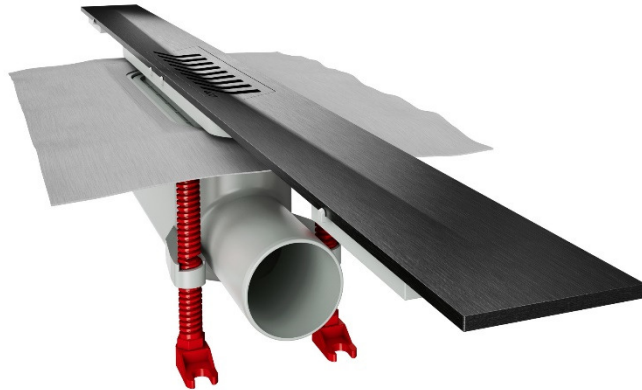

Product benefits

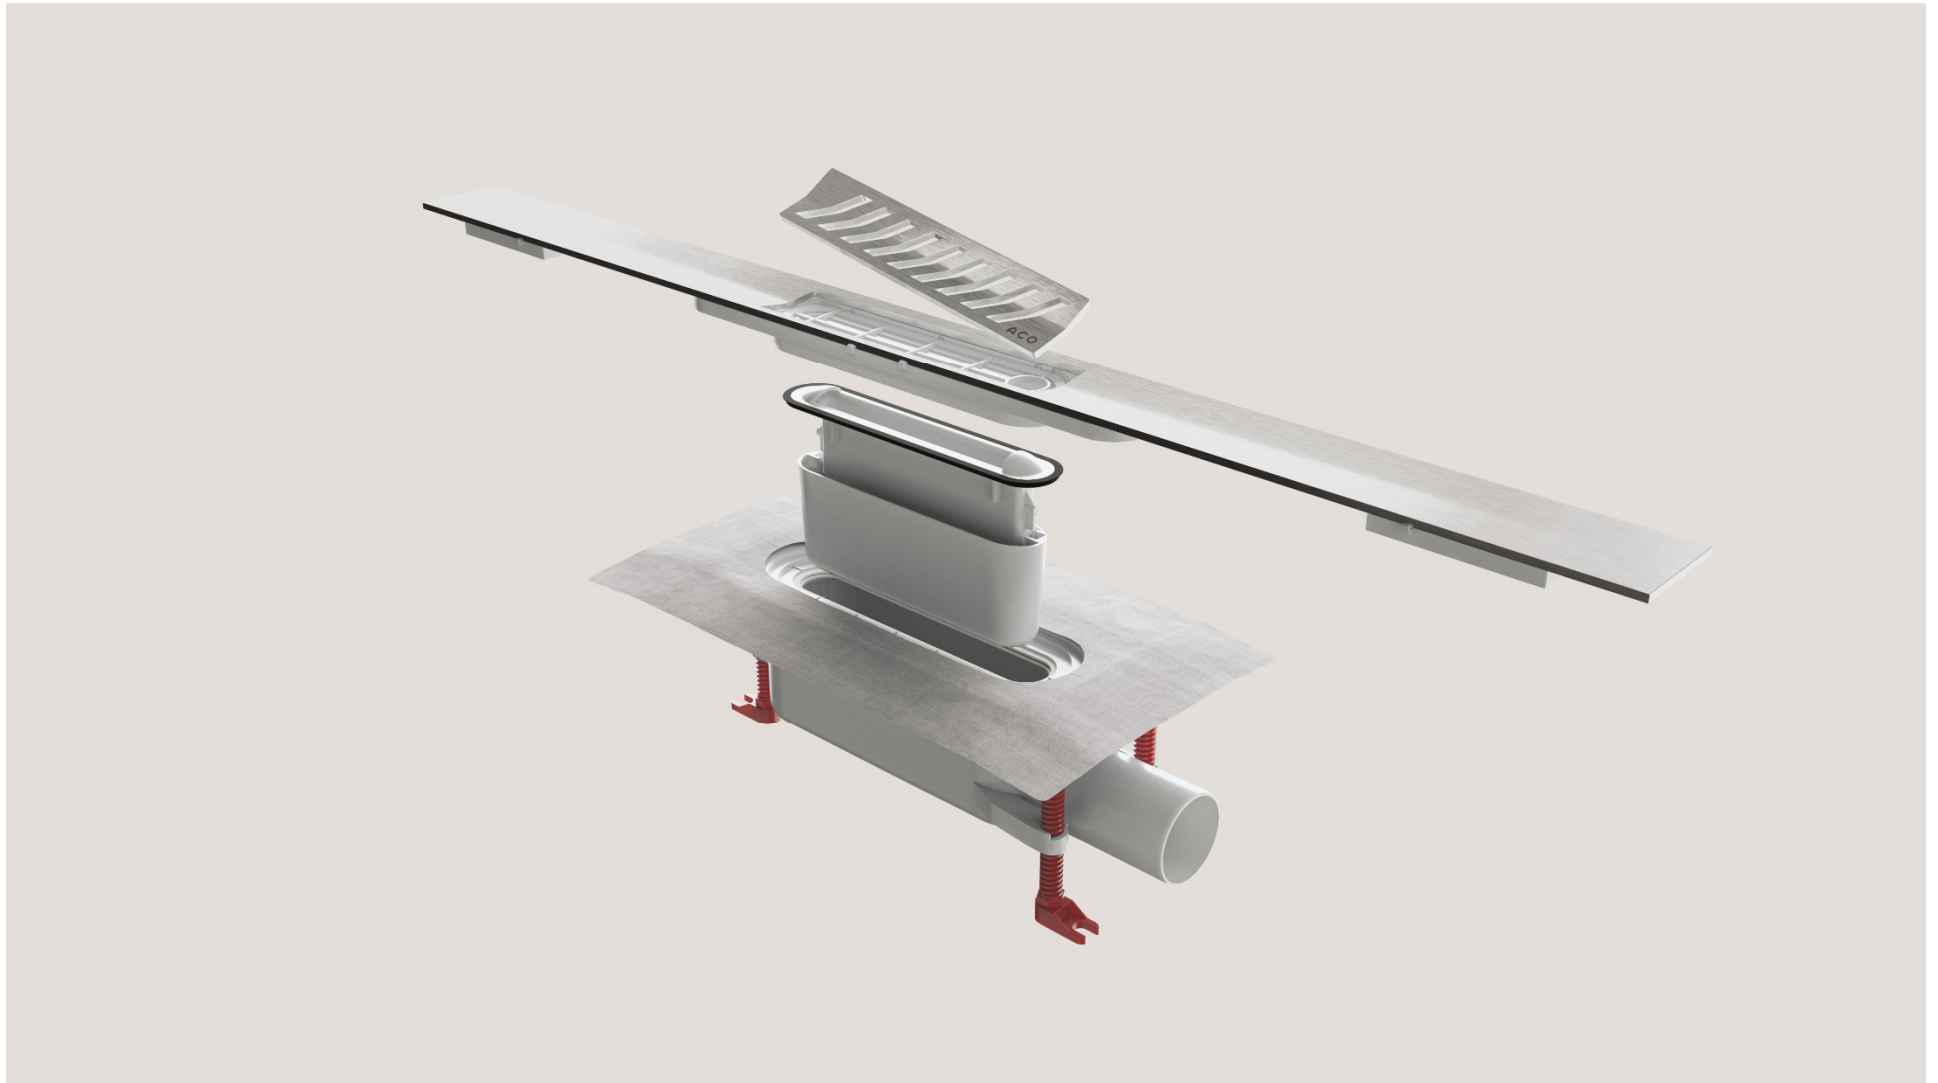

- unique minimalist design
- electro-polished surface for a lasting high-quality appearance
- installation of shower channel profile with tile height < 10 mm without extension piece
- alignment support for installation
- toolless grate removal through tip&flipp function
- compliant with noise protection according to DIN 4109 and VDI 4100

Product information

- material: Stainless steel, grade 304
- surface: electropolished, PVD-coated (Black)
- load class K3 (DIN EN 1253-1)
- profile width: 55 mm
- shower profile with longitudinal and transverse gradient
- Profile length can be shortened by 80 mm on site
- Profile with design grating, hair strainer and extension (extension for tile heights from 15 - 35 mm)

Shower channel profile Stripes - Black

Shower channel profile Plate - Black

Easy installation

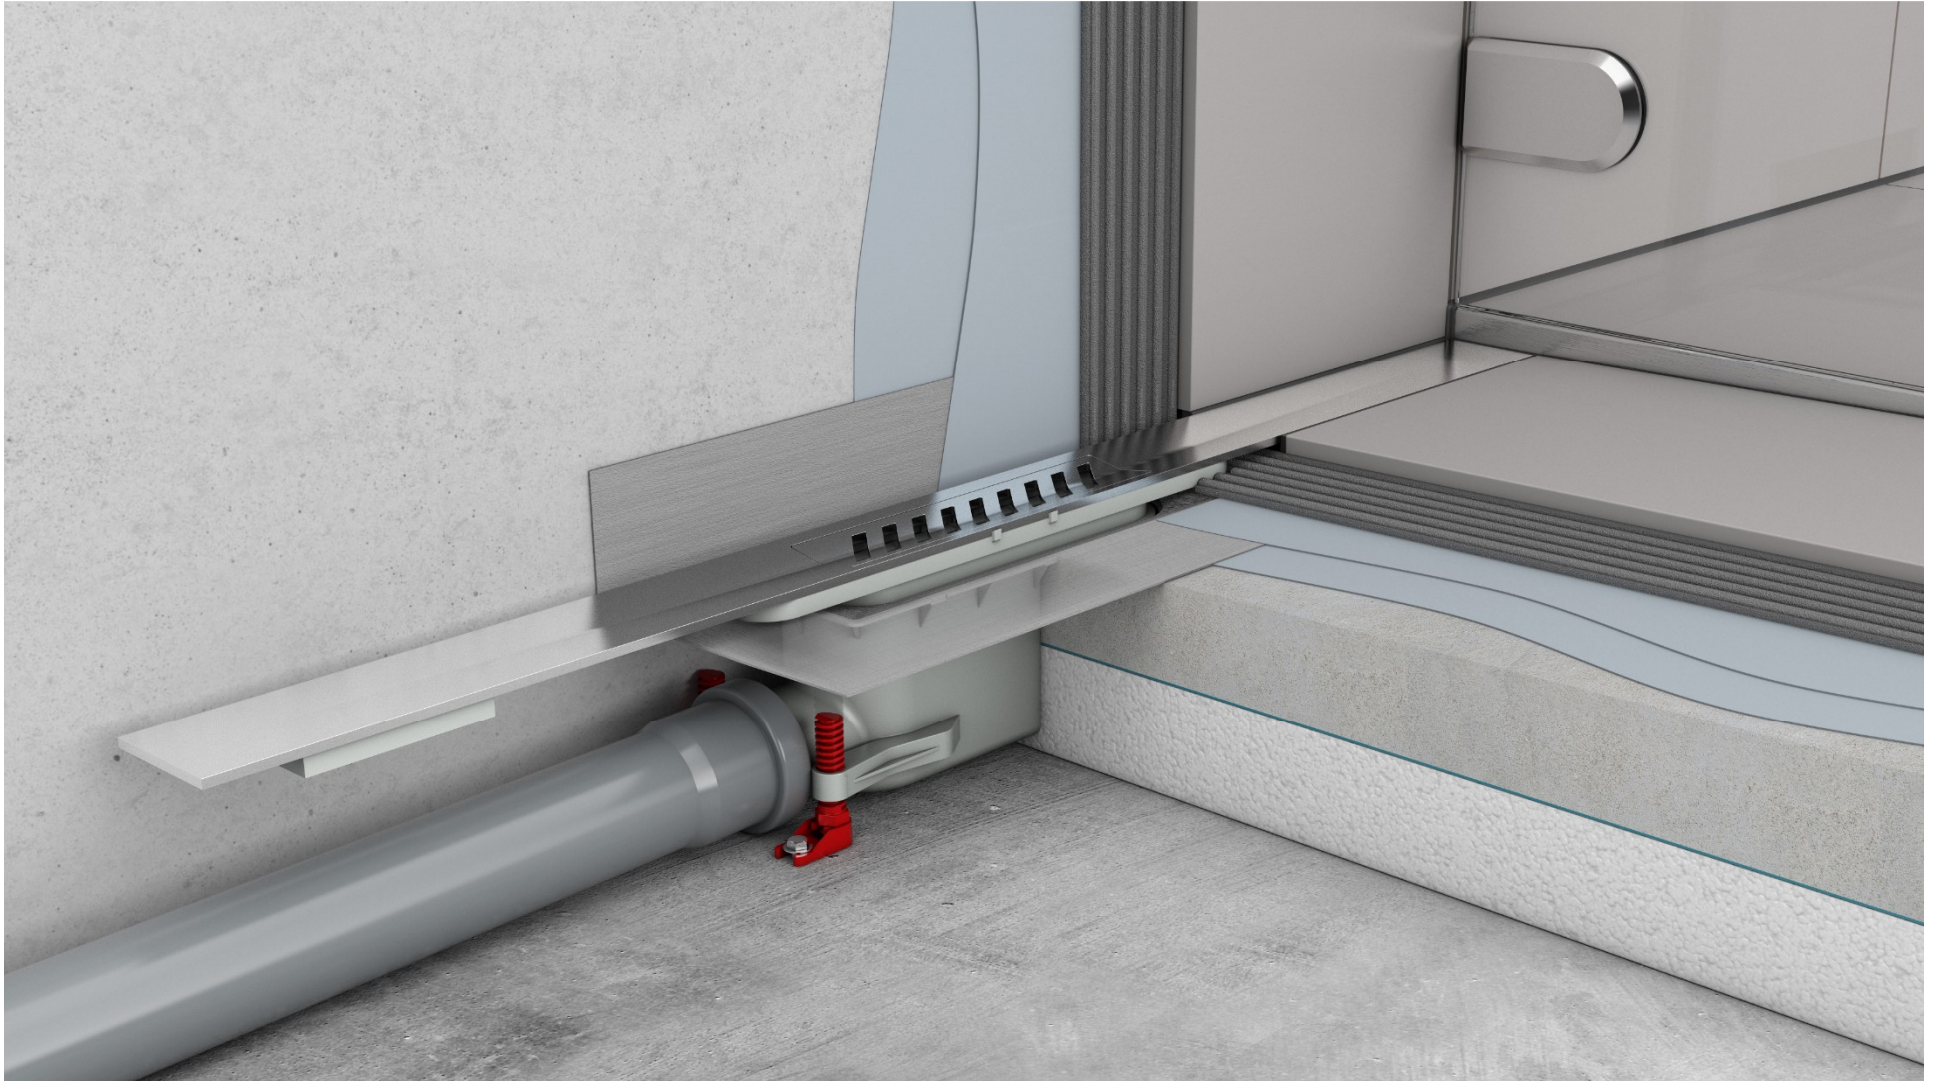

Positioning:
The shower channel can be positioned in the middle or directly against the wall.

Height adjustment:
The height is adjusted with stable plastic screws.

Length adjustment:
The profile can be shortened by 40 mm on each side without affecting the smooth profile transition.

Easy to clean

Tip&Flip:
By simply pressing the ACO logo with your finger, the grate can be lifted and removed with one hand.

Built-in gradient:
The built-in slope is subtly emphasized and ensures optimal and easy-to-clean drainage.

Removable internal parts:
High-quality optics without annoying corners and edges makes the shower channel easy to care for.
